

FACILITIES FOR INTRASTATE ACCESS

Regulations, Rates and Charges Applicable to
Facilities for Intrastate Access, Ancillary, and Miscellaneous Services
provided by
FRONTIER NORTH INC.
To Intrastate Customers

Services herein are provided by means of wire, fiber optics, radio or any other suitable technology or a combination thereof.

FACILITIES FOR INTRASTATE ACCESS

1. APPLICATION OF TARIFF

1.1 Except as otherwise provided below, regulations in Section 1 of the Frontier Operating Companies Tariff FCC No. 5 relevant to intrastate service provided in the state of Wisconsin, apply to service provided under this tariff. (T)

1.2 Exceptions

This tariff is also applicable to Local Exchange Carriers (LECs) providing intraLATA service as an Interexchange Carrier (IC).

FACILITIES FOR INTRASTATE ACCESS

2. GENERAL REGULATIONS

2.1 Except as otherwise provided below, regulations in Section 2 of the Frontier Operating Companies Tariff FCC No. 5 relevant to intrastate service provided in the state of Wisconsin, apply to service provided under this tariff. (T)

2.2 Exceptions

When Switched Access is provided to a LEC that is offering intraLATA Switched Access Service as an IC, and all or a portion of the Switched Access will be provided by a Secondary Exchange Carrier (SEC), the Telephone Company will arrange for any facilities required and will rate and bill the Switched Access from this tariff.

When Special Access is provided to a LEC that is offering intraLATA Interexchange Special Access Service as an IC, and a portion of the Special Transport is provided by another telephone company, such service will be furnished in accordance with Meet Point Billing regulations as set forth in Frontier Operating Companies Tariff FCC No. 5. (T)

FACILITIES FOR INTRASTATE ACCESS

3. ORDERING OPTIONS FOR FIA

3.1 Except as otherwise provided below, regulations in Section 3 of the Frontier Operating Companies Tariff FCC No. 5 relevant to intrastate service provided in the state of Wisconsin, apply to service provided under this tariff. (T)

3.2 Exceptions

Access Service Requests (ASRs) are not required for Feature Group C (FGC) Switched Access Service provided to a LEC offering intraLATA service as an IC, except when the LEC requires new NXX(s) to be opened or existing NXX(s) deleted for Service Access Code (SAC) Access Service. ASRs are required for all other Switched Access Services provided to a LEC offering intraLATA service as an IC.

FACILITIES FOR INTRASTATE ACCESS

4. SWITCHED ACCESS

- 4.1 Except as otherwise provided below, regulations in Section 4 of the Frontier Operating Companies Tariff FCC No. 5 relevant to intrastate service provided in the state of Wisconsin, apply to service provided under this tariff. (T)
- 4.2 Exceptions
- 4.2.1 Services available in Frontier Operating Companies Tariff FCC No. 5, Section 4, which are NOT applicable to Wisconsin intrastate operations: (T)
- Frontier Operating Companies Tariff FCC No. 5: (T)
- Tandem Access Sectorization (TAS). (Not available in Wisconsin)
Common Channel Signaling System 7 (CCS7) Access Arrangement.
(Interstate service only)
- 4.2.2 Switched Access may also provide for the ability to originate calls from an end user's premises to the meetpoint of a LEC offering intraLATA service as an IC, and to terminate calls from the meet point of a LEC offering intraLATA service as an IC to an end user's premises.
- 4.2.3 Feature Group C is available to LECs offering intraLATA services as an IC. Feature Groups A, B and D are available to such LECs in offices converted to intraLATA equal access. When Feature Group D is available in an end office, Feature Group C Service will not be discontinued to LECs offering intraLATA services as an IC.
- If the Feature Group C connection is made to an access tandem, in the case of a LEC offering intraLATA services as an IC, the Feature Group C access area will be that of all end offices within the LATA.
- When SAC Access Service is provided in conjunction with Feature Group C to LECs offering intraLATA service as an IC, the service will be provisioned in accordance with the technical characteristics available with Feature Group C. The design blocking objective will also be the same as that of Feature Group C.
- 4.2.4 Switched Transport may also provide for the transmission of Switched Access communications between the meet point of a LEC offering intraLATA services as an IC and the originating or terminating end office switch(es) in the access area.

FACILITIES FOR INTRASTATE ACCESS

4. SWITCHED ACCESS (Continued)

4.2 Exceptions (Continued)

- 4.2.5 Where Transport Facility is provided in conjunction with Feature Group C to a LEC offering intraLATA services as an IC, the Transport Facility will be calculated as the airline mileage distance between the end office where the call originates and the end office where the call terminates, times a billing percentage reflecting the portion of the transport provided by the Telephone Company and/or any Secondary Exchange Carrier associated with the Telephone Company. A single billing percentage will apply to all traffic, by type (i.e. DDD, Operator, etc.) between the same two end offices.
- 4.2.6 Jurisdictional reporting requirements as set forth in Frontier Operating Companies Tariff FCC No. 5, do not apply to Feature Group C Switched Access Service provided to LECs offering intraLATA services as an IC. (T)
- 4.2.7 For originating calls over FGC or for originating 800 Access Service provided to a LEC offering intraLATA service as an IC, chargeable access minutes are derived from measured access minutes through the use of a Telephone Company factor.

FACILITIES FOR INTRASTATE ACCESS

5. SPECIAL ACCESS

- 5.1 Except as otherwise provided below, regulations in Section 5 of the Frontier Operating Companies Tariff FCC No. 5 relevant to intrastate service provided in the state of Wisconsin, apply to service provided under this tariff. (T)
- 5.2 Exceptions
- 5.2.1 Services available in Frontier Operating Companies Tariff FCC No. 5, Section 5, which are NOT tariffed for Wisconsin application: (T)
- Frontier Operating Companies Tariff FCC No. 5: (T)
- Type II Videoband Service
DS1/DS3/FiberConnect Enhanced Access Diversity (EAD)
FiberConnect Service
High Capacity Digital E1
Digital Data Service Secondary Channel
Metro Ethernet Special Transport (T)
High Voltage Protection
Miscellaneous State-Specific Services
- 5.2.2 Special Access may also provide a transmission path to a CDL and the meet point of a LEC offering intraLATA service as an IC, within a LATA for Intrastate Telecommunications.
- 5.2.3 The Special Transport rate element may also provide for the transmission facilities between a serving wire center associated with a CDL and the meet point of a LEC offering intraLATA service as an IC or between a Telephone Company Hub Wire Center and the meet point of a LEC offering intraLATA service as an IC.
- Where Special Transport reflects facilities to the meet point of a LEC offering intraLATA service as an IC, the technical characteristics of the Special Access circuit will be defined at the first Wire Center of such LEC.
- 5.2.4 A Special Access Line may be used to provide a connection between a CDL and the local network of a LEC offering intraLATA service as an IC. When a SAL is used for this purpose, Special Transport mileage charges apply between the Serving Wire Center of the CDL and the meet point of such LEC.

FACILITIES FOR INTRASTATE ACCESS

5. SPECIAL ACCESS (Continued)

5.2 Exceptions (Continued)

- 5.2.5 A two-point configuration is a circuit which may be provided to connect a CDL and the meet point of a LEC offering intraLATA service as an IC, either directly connected or through a Hub Wire Center where multiplexing functions are performed.

A multipoint configuration is a circuit which may be provided to connect two or more CDLs and the meet point of a LEC offering intraLATA service as an IC, through a Telephone Company Hub Wire Center.

- 5.2.6 For Special Access Service provided to a LEC offering intraLATA service as an IC, the mileage to be used to determine the monthly rate for Special Transport is calculated on the airline distance between the serving wire center of a CDL and the first wire center in the area of such LEC.

When there is a Hub Wire Center involved, Special Transport mileage will also be measured from the Hub Wire Center to the first wire center in the area of a LEC offering intraLATA service as an IC. Mileage is computed for each section and rates are applied accordingly.

When the mileage determined as above is measured to the first wire center in the area of a LEC offering intraLATA service as an IC, the mileage billed is based on the calculated distance times a billing percentage established for the route.

- 5.2.7 Bridging may be used to connect two or more CDLs and the meet point of a LEC offering intraLATA service as an IC, in a multipoint arrangement.

- 5.2.8 Toll volume plan are grandfathered as of August 17, 2013 for Section 5.6.14 and 5.7.18 of FRONTIER Operating Companies Tariff FCC No. 5.

(N)
(N)

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES

- 6.1 Except as otherwise provided below, regulations in Section 6 of the Frontier Operating Companies Tariff FCC No. 5 relevant to intrastate service provided in the state of Wisconsin, apply to service provided under this tariff. (T)
- 6.2 Exceptions
 - 6.2.1 Testing for Switched Access is not applicable to Switched Access provided to a LEC offering intraLATA service as an IC.
 - 6.2.2 IntraLATA Equal Access is offered in Wisconsin under the terms and conditions set forth in 6.3 and 6.4 following.
 - 6.2.3 The Service Provider Number Portability Fee as set forth in 6.15 is charged only on an Interstate basis.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.3 Balloting and Allocation Process For IntraLATA Equal Access

The Balloting and Allocation Process for IntraLATA Equal Access is an arrangement whereby an end user may select or be allocated to an IC or local exchange carrier (LEC) to place intrastate, intraLATA MTS/MTS-type calls without the 10XXX or 101XXXX access code. This IC or LEC is referred to as the end user's intraLATA primary interexchange carrier (IPIC).

In the event that only one IC or LEC orders FGD or BSA-D to provide intraLATA service from an end office, the Balloting and Allocation Process for the IPIC set forth below will not apply.

On the effective date(s) of interLATA and intraLATA equal access (i.e., introduction of FGD or BSA-D in a serving end office), end users who have not designated or been allocated to an IC or LEC will continue with the same IC or LEC service arrangement as existed prior to office conversion until the allocation process described in (B) occurs.

(A) End User Notification and Equal Access Balloting Process for IntraLATA Equal Access

When intraLATA and interLATA equal access is made available concurrently, end users will be notified of the availability of equal access by means of an equal access ballot. ICs and LECs intending to participate in the Balloting Process for each serving end office must inform the Telephone Company in writing no later than 120 days prior to the end office conversion to FGD or BSA-D. The initial ballot, the first of two ballots the end user may receive, listing all ICs and LECs participating in the balloting process, and an explanation of equal access will be mailed to the end user approximately 90 days prior to the end office conversion to FGD or BSA-D. IC and LEC names appearing on the ballot will be listed in a random fashion by end office to ensure that no IC or LEC will always appear first on the ballot.

Using the initial ballot, which end users will be requested to return within 45 days after receipt, the end user may designate an IC or LEC for all of its lines or may choose a different IPIC for each of its lines. Where an end user has a multi-line hunt group and wants to designate several IPICs for this hunt group, special arrangements may be made by contacting the Telephone Company. Customers may designate that they do not want an intraLATA primary IC by notifying the Telephone Company. This choice is considered a valid selection and the nonrecurring charge as set forth in 6.3(K) will apply to any subsequent change made after the conversion date.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.3 Balloting and Allocation Process For IntraLATA Equal Access (Continued)(A) End User Notification and Equal Access Balloting Process for IntraLATA Equal Access (Continued)

A second ballot will be sent to an end user who has not designated an IC or LEC, either by return of the initial ballot or by appearing on an IC or LEC Customer list. The second ballot will be sent 30 days after conversion of the end office. If the end user does not respond to the second ballot by the requested date, then that end user will be assigned to the allocated IC or LEC shown on the second ballot.

When intraLATA equal access is made available in an end office at some time after the end office has converted to interLATA equal access, the Balloting and Allocation process for the intraLATA IPIC will not apply.

(B) Allocation Process

An IC or LEC must notify the Telephone Company of its intent to participate in the allocation process 52 days prior to the end office conversion to equal access. The IC or LEC must also identify whether it will participate in the allocation of business lines, residence lines, or any combination.

The Telephone Company will tabulate the initial ballots received from the end users described in 6.3(A) and the IC and LEC Customer lists described in 6.3(C). The percentage of end users who have selected a participating IC or LEC will be determined from these ballots and lists. These percentages will be used for the allocation of end users who did not respond to the initial ballot or appear on an IC or LEC list. The percentages used for allocation will be determined approximately five days after end office conversion. A second ballot, indicated in 6.3(A), will be sent to end users who have been allocated to an IC or LEC.

Separate allocation processes will be used for residence and business lines. The number of end users designating an IC or LEC by returning the initial ballot or appearing on an IC or LEC end user list will be totaled. This total will be utilized to compute the percentages used for allocation of residence and business Customers.

If an IC or LEC participating in the ballot process notifies the Telephone Company that it does not wish to participate in the allocation process, the percentage of Customers allocable to that nonparticipating IC or LEC will be allocated to the remaining ICs and LECs.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.3 Balloting and Allocation Process For IntraLATA Equal Access (Continued)(C) Interexchange Carrier Customer Lists

The Telephone Company will accept IC and LEC Customer lists identifying end users who have made individual arrangements with the IC or LEC to designate the IC or LEC as their intraLATA primary long distance carrier. The list should be in the form of magnetic tape or paper printout. IC and LEC lists may continue to be received after the initial ballot deadline. All lists must be submitted to the Telephone Company no later than 20 days prior to the end office conversion to be included in the allocation process. If end user ballots are received by the IC or LEC, the end user will be included in the IC or LEC Customer list. The IC or LEC must retain the actual ballots for inspection by the Telephone Company for a period of one year after end office conversion.

(D) End User Choice Discrepancy

An IC or LEC is required to certify at the time it submits end user lists to the Telephone Company that it has on file, or has instituted steps designed to obtain signed letters of agency or confirmations of choice from the end user. The IC or LEC is not required to submit letters of agency when submitting end user lists to the Telephone Company, but should maintain the confirmations or letters on file for use in dispute resolution. The IC or LEC should request written confirmation of choice from its Customers no later than the date of submission of its first bill to the Customer.

When an end user indicates more than one IPIC per line or returns an illegible ballot, the Telephone Company will contact the end user for clarification.

When the Telephone Company identifies a conflict between a ballot and an IC or LEC list, or between lists submitted by two or more ICs and/or LECs, the Telephone Company will notify, within 10 days, all affected ICs and LECs via a conflict report. Those ICs and LECs not involved in any conflicts will receive a zero conflict report from the Telephone Company.

When an end user returns a ballot to the Telephone Company and also appears on a conflicting IC or LEC Customer list, the ballot takes precedence. If an end user appears on two or more IC or LEC Customer lists, the end user will be allocated along with the nonrespondents to the initial ballot. A letter sent with the second ballot will inform the end user that there exists a conflict between two or more ICs and/or LECs and a selection must be made by the deadline of the second ballot, unless the allocated IC or LEC indicated is the end user's choice.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.3 Balloting and Allocation Process For IntraLATA Equal Access (Continued)(E) IPIC Charge Application

Initial end user selection of an IPIC by ballot or appearing on an IC or a LEC list will not incur a charge. A change of IPIC selection prior to the end office conversion to intraLATA equal access will not incur a charge. Notification of a change in an IPIC may be coordinated by the end user with either the IC or LEC selected or with the Telephone Company, if it is not the selected LEC. Within six months after conversion to equal access, an end user allocated to an IC or LEC may elect to change to another IC or LEC at no charge, on a one-time basis. After the six month period has elapsed, a nonrecurring charge in 6.3(K) will apply to change the IPIC. After conversion to equal access, end users who select an IC or LEC by returning the initial ballot will be charged for each change made.

In end offices converted to Equal Access new end users and multi-party end users who upgrade to individual lines must presubscribe to the IPIC of their choice at the time an order is placed for service. The IPIC may be an IC or LEC (the Telephone Company or another LEC). Upon the end user's selection of the IPIC, at the time of placing an order, a confirmation notice will be sent identifying the IC or LEC selected as the IPIC. From the date of the confirmation notice, he will have 90 days to change his presubscription selection without a charge. If an IPIC is not chosen at the time the order for service is submitted, the end user will be sent a confirmation notice which contains a list of ICs and LECs providing intraLATA service, and will be informed that they have 90 days to contact the IC or LEC of their choice or the Telephone Company to apply for the IPIC arrangement. If notice is received by the Telephone Company within 90 days of the in-service date for local service or upgrade, no charge will be billed to the end user. If notice is received after 90 days, the end user will be billed a nonrecurring charge for each IPIC as in 6.3(K). Until the end user receives service from the selected carrier, he may access the carrier of his choice by dialing the appropriate 10XXX or 101XXXX carrier identification code.

The Telephone Company will make post conversion changes in the end user's IPIC assignment pursuant to an IC or LEC provided list of Customers, accepted by the Telephone Company under conditions in (C) and (D). Should an end user dispute authorization of the change within two years of the IPIC assignment, the Telephone Company will place the end user on the previous carrier network where possible and the carrier will be billed according this tariff.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.3 Balloting and Allocation Process For IntraLATA Equal Access (Continued)(F) Unauthorized IntraLATA Primary Interexchange Carrier (IPIC) Restoral Change

An Unauthorized IPIC Change is a change in the preferred IPIC IC that the end user or Pay Telephone Service Provider denies authorizing.

If an end user or Pay Telephone Service Provider denies requesting a change of IPIC IC as submitted by the alleged unauthorized IC, the alleged unauthorized IC will be assessed the IPIC Charge as specified in this tariff for:

- Changing the end user or Pay Telephone Service Provider to the disputed IC, and
- Placing the end user or Pay Telephone Service Provider on their previous IC network or the IC network of their choice.

In accordance with the Federal Communications Commission's Slamming Liability Rules in CC Docket 94-129, if an alleged unauthorized carrier is ultimately exonerated of liability, the alleged unauthorized IC is entitled to receive full payment from the end user or Pay Telephone Service Provider for all services provided. In such situations, any IPIC Charges assessed against the alleged unauthorized IC by the Telephone Company are subject to rebilling to the end user or Pay Telephone Service Provider by the alleged unauthorized IC.

(G) Multi-party End Users

Multi-party end users will continue with the same carrier service arrangement which existed prior to the end office conversion. However, multi-party end users may access the carrier of their choice by dialing the appropriate 10XXX or 101XXXX carrier identification code. In certain suitably equipped end offices, two-party Customers may subscribe to the carrier of their choice.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.3 Balloting and Allocation Process For IntraLATA Equal Access (Continued)(H) Cancellation of a Carrier Participation

If an IC or LEC cancels all of its FGD or BSA-D service in the converting end office prior to the conversion date or discontinues all of its FGD or BSA-D service within two years after the introduction of FGD or BSA-D in the converting end office, the carrier is obligated to do the following:

- (1) Notify the Telephone Company of the cancellation of their FGD or BSA-D service, and
- (2) Contact in writing all end users who have selected, or been allocated to, the canceling carrier as their IPIC, inform these end users of the cancellation, request the end users to select a new IPIC, and state that the canceling carrier will pay the nonrecurring charge as set forth in 6.3(K).

The Telephone Company will bill the canceling IC or LEC for a period of two years from the discontinuance of FGD or BSA-D service, the nonrecurring charge as set forth in 6.3(K) for each end user this carrier has currently designated to it. Such charge will not apply to the canceling carrier where the canceling IC or LEC transfers or assigns its FGD or BSA-D services and the associated 10XXX or 101XXXX code to another carrier in such manner that the Telephone Company does not change end user records or if another carrier elects to pay nonrecurring charge on behalf of the canceling IC or LEC.

(I) Liability of the Telephone Company

If through the fault of the Telephone Company, the end user is not subscribed to its chosen IPIC, the nonrecurring charges in 6.3(K) do not apply to reassign the end user to his chosen IPIC.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)

6.3 Balloting and Allocation Process For IntraLATA Equal Access (Continued)

(J) Carrier Desired Due Date (ICDDD) IPIC Installation

An IC or LEC may request a desired due date for IPIC installation for a specific, single end user acting on behalf of an end user post equal access conversion. This ICDDD is a mutually agreed upon negotiated due date, determined to be between 3 and 45 business days from the date of receipt of the order. The carrier must coordinate the ICDDD with the Telephone Company prior to sending in the first order.

The ICDDD does not apply to routine lists provided by the carrier, as set forth in 6.3(C) and (D). The Nonrecurring Charge for IPIC as set forth in 6.3(K), applies to each line converted to the carrier requesting ICDDD. This charge will be billed to the carrier's end user Customer.

(K) Nonrecurring Charge for IntraLATA Primary Interexchange Carrier (IPIC)

The nonrecurring charge for IPIC is as follows:

	<u>Nonrecurring Charge</u>
Per Telephone Company	
Local Service Line or Trunk	*

* Refer to FRONTIER Operating Companies Tariff FCC No. 5.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.4 End User Lists(A) Presubscription List for IntraLATA Equal Access

Prior to conversion to intraLATA equal access an IC or LEC may request a list of the Telephone Company's end users of record served from that end office switch. A single Presubscription List will be provided to intraLATA toll providers as follows:

- (1) The Telephone Company will provide a list from its Customer data base. The list may be provided on magnetic tape, electronic transmission or paper printout, at the option of the IC or LEC, at rates provided in 6.4.1(A). Foreign listings, PBX stations, CU centrex stations, public coin station and numbers not in service will not be provided.
 - (a) The Initial List will be provided to the IC or LEC no later than 30 days after receipt of the order and payment by the IC or LEC of charges in 6.4.1(A). The nonrecurring charge for the Initial List applies per order. A single order may contain all end offices having the same intraLATA equal access conversion date. The telephone number will not be provided if an end user has a nonpublished number.
 - (b) The Account Activity List, which includes a listing of all changes to the Customer data base, since the Initial List was produced, will be provided on a cyclic basis. The Account Activity List will only include information for those end users that are presubscribed to the IC or LEC (including end users with nonpublished numbers) for the sole purpose of updating the IC's or LEC's Customer account information. There is no charge for this list.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.4 End User Lists (Continued)(A) Presubscription List for IntraLATA Equal Access (Continued)

- (2) The IC or LEC agrees to use the Initial List for the sole purpose of contacting potential Customers, or existing Customers, regarding intraLATA telecommunications services available through equal access to be obtained from the Telephone Company. The IC or LEC agrees not to sell, or reproduce in any manner, in whole or in part, the lists or permit such to be done.
- (3) The IC or LEC shall indemnify, protect and save harmless the Telephone Company from and against any and all loss, liability, damages and expense arising out of any demand, claim, suit or judgment for damages which may arise out of the Telephone Company's supplying of listing information, services or records.
- (4) The Telephone Company and the IC or LEC agree that the mutual objective of the parties is to conduct their respective businesses to avoid confusion by the end users as to the separate and independent identity of the respective companies and their services. Neither the Telephone Company nor the IC or LEC shall make any representation to end users, the public, prospective advertisers, expressed or implied, written or oral, which would imply that the IC or LEC is the same as, a part of, or associated with the Telephone Company.
- (5) This service may be terminated by either the Telephone Company or the IC or LEC upon thirty (30) days' written notice. The Telephone Company reserves the right to terminate this service immediately upon written notice if the IC or LEC misuses the list information. Performance by the Telephone Company shall be excused in the event of strike, riot, act of God or any other cause beyond the reasonable control of the Telephone Company.

FACILITIES FOR INTRASTATE ACCESS

6. MISCELLANEOUS SERVICES (Continued)6.4 End User Lists (Continued)(B) Allocation Lists

- (1) The Telephone Company will provide to the IC or LEC, at no charge, a list of end users that have been allocated to the IC or LEC as described in 6.3(B). This list will be provided after the Balloting and Allocation Process occurs.
- (2) A list of all end users who have been allocated, in accordance with 6.3(B), will be available to an IC or LEC upon request. Charges in 6.4.1(A) will apply. The nonrecurring charge for the Allocation List applies each time the IC or LEC orders the service. A single ASR may contain all end offices having the same equal access conversion date.

(C) Snapshot List

The Snapshot List is a summary of selected end user information for a specific IC or LEC which resides in the Telephone Company Customer data base. The Snapshot List may be provided on magnetic tape, electronic transmission or paper printout, at the option of the IC or LEC, at rates provided in 6.4.1(B). Foreign listings, PBX stations, CU centrex stations and numbers not in service will not be provided.

The Snapshot List will be provided to the IC or LEC no later than 30 days after receipt of the order. The nonrecurring charge for the Snapshot List applies per order.

The purpose, liability and objectives associated with the provision of the Snapshot List is set forth in 6.4(A)(2)(3)(4)(5).
