PAYPHONE SERVICE

3.1 Payphone Service

3.1.1 General

- A. Payphone Service is a basic exchange service, including coin supervision functionality when needed, provided to customers for the connection of payphones. A payphone is defined as any telephone made available to the public on a fee-per-call basis, independent of any other commercial transaction, for the purpose of making telephone calls, whether the telephone is coin-operated or is activated either by calling collect or using a calling card. Coin supervision functionality is a central office function that provides the payphone with coin rating capability, coin deposit recognition, and coin collection and return capability. The customer orders the coin supervision functionality from the Company when their payphone instrument is not equipped with these functions. Each line subscribing to Payphone Service must subscribe to Touch Call Service as specified in section 3.1.2 and Selective Call Screening Service as specified in Section 3.1.2. Consequently, Payphone Service will be provided only in those central offices which are capable of providing Selective Call Screening Service. (T)

3.1.2 Rates

- A. Payphone Flat Rate Service, per line (Business one-party rate as specified in Section 6 of the Product Guide). (T)
- B. Touch Call Service must be provided on each line subscribing to Payphone Service. Charges for Business Touch Call Service as specified in the Product Guide will apply in addition to all other charges. (T)
- C. Selective Call Screening Service, as specified in 7.1.4 of the Product Guide, must be provided on each line subscribing to COCOT service. Charges for Selective Call Screening Service will apply in addition to all other charges. (T)
- D. Payphone Service is subject to regular Nonrecurring Charges as specified in the Product Guide. (T)

PAYPHONE SERVICE

3.1 Payphone Service (Continued)

3.1.2 Rate (Continued)

- E. In addition to the rates set forth above, a “Coin Supervision Additive” will apply when the Coin Supervision functionality must be provided by the Telephone Company. The Coin Supervision additive is \$1.95 per line, per month.
- F. Payphone Service is subject to intrastate and interstate End User Common Line Charges as specified in Section 4 of the Telephone Company I.U.R.C. Tariff No. 3 and Section 4.7 of Rochester Telephone Corporation Tariff F.C.C. No. 1, respectively

3.1.3 Conditions

- A. All stations must be register with the FCC in compliance with FCC Docket 84-270.
- B. All stations must provide dial tone first and be able to reach an operator, local and 911 Service where available without the use of a coin.
- C. All stations must be compatible with hearing aids as specified in FCC Docket 83-427.
- D. All stations must provide accessibility to all Interexchange Carriers where equal access is provided.
- E. All stations must be able to provide calling card, collect and third-party billed long distance calls without the use of a coin.
- F. All stations must be equipped with suitable audible signals and arranged to receive incoming calls.
- G. All stations must be equipped with tone-type address signaling.
- H. Timing of local calls shall not be permitted.
- I. The station installation must be in accordance with any rules and/or standards promulgated by the American National Standards Institutes, Inc. and the Indiana Construction Rules (Building Code) which are concerned with handicapped persons.
- J. Extension telephones are permitted provided they are within view of the user of the payphone.
- K. An informational display shall be provided within three feet of the payphone to inform the user of the telephone number of the station, the general operation, the owner’s name, the method of reporting service problems and the method for receiving a credit for a noncompleted call for which the payphone did not return deposited coins. This display shall also inform the user of dialing instructions required in order to access the long distance carriers available on an equal access basis.

PAYPHONE SERVICE

3.1 Payphone Service (Continued)

3.1.3 Conditions (Continued)

- L. The person or company in whose name the access line is billed shall be responsible for payment to the Telephone Company for any charges for Directory Assistance.
- M. Selective Class of Call Screening is required for COCOT Service. Consequently, neither operator handled sent-paid calls nor direct dialed long distance sent-paid calls will be permitted.
- N. A COCOT subscriber is entitled to one listing in the alphabetical and classified sections of the Directory. When requested by the customer, additional listings may be provided in accordance with Section 3 of the Product Guide. (T)
- O. The provider of the COCOT shall be required to provide to the Telephone Company such information as is required by the Telephone Company, i.e., FCC registration information and any other normal information the Telephone Company may require for customer account identification.
- P. As with Semipublic and Public Service, the customer may not attach more than one coin station to any line that is subscribed to this Service. The customer may not attach a COCOT station to any line that is served by a key, PBX or any other switching system. The customer may not attach a COCOT station to any line subscribed to a service other than COCOT Service.
- Q. COCOT Service is not offered in conjunction with FX Exchange Service.
- R. The Telephone Company will apply the rules and regulations of its tariff to the extent necessary to resolve any violation.
